Qualified, Committed

- Technical toolsets aligned to your activities.
- Scalable, Proven resources
- Proven Best Practices: Robust, Transparent Auditing
- Highly qualified, In depth Product and Technical expertise.
- Minimum 7 years hands on experience
- Peerless client commitment

Applications drive a company's business processes but the challenges of supporting heterogeneous application environments are increasing.

For capital markets firms to achieve high performance, they first need to understand the dynamics of the changing regulations and business models.

Operational optimization.

- For Investment banks, asset and wealth management companies and broker/dealers.
- Risk and limits management.
- Audit – Collateral and compliance monitoring.

Risk Management

Development

- We accurately produce specifications which translate business requirements into well-defined, technical proposals that can be implemented in any project.
- We assess existing application workflows and advise on consolidation and streamlining of processes and systems.
- Perform code and/or design review to provide an objective view of the quality of your software and systems and thoroughly investigate technical feasibilities.
- We recognise that code drops require a delicate combination of proven methods and agile development tools.

We ask pertinent questions to set realistic expectations.
Development project trajectories are always properly set.

- We adopts agile or waterfall methods as required and get up to speed quickly.
Geared towards value for money and low latency solutions.
- We seek synergies between development tools, languages, infrastructure assets for our clients.
- Seamless team integration.
